Prayudi Tirta Bayu

Backend Developer

Email: prayuditb@gmail.com

Phone/WhatsApp: +62 851 5532 7555

INDUSTRY EXPERTISE & TECHNOLOGIES

TypeScript – Node.js – Golang – Microservice – Google Cloud Platform – Google Pub/Sub – NestJS – ExpressJS – React Native
PostgreSQL – MongoDB – Firebase – Docker – Kubernetes – REST API – GraphQL – ElasticSearch

EXPERIENCE

Backend Developer – *Youtap Indonesia*

Jun 2022 – present

Youtap Indonesia provides a comprehensive Point of Sale (POS) ecosystem that enables merchants of all sizes to manage digital payments, products, and inventory. As a Backend Developer, I manage core POS services. I led a strategic transition from a monolithic repository to a decoupled microservices architecture, including a NestJS upgrade. This initiative eliminated cross-team dependencies, improved development agility, and significantly enhanced system stability.
Tech stacks: Nodejs, Golang, MySQL, PostgreSQL, GraphQL, Google Cloud Run, Google PubSub

Backend Developer – *Keller William Realty Inc.*

Jul 2021 – Jun 2022

KW Command is an integrated CRM and operating system that streamlines lead generation, marketing, and transactions. As part of the engineering team, I developed services that synchronize agent emails and Google Calendars . This automation ensures agents remain consistently engaged with potential customers by centralizing all communication and scheduling within the platform.
Tech stacks: Nodejs, MongoDB, Kubernetes, Google PubSub

Backend Developer – *Tebengan Indonesia*

May 2020 – Aug 2021

Tebengan Indonesia is an algorithm-driven mobility platform providing shared shuttle and ride-sharing services to improve urban transit efficiency. As a Backend Developer, I engineered the core matching engine to connect drivers with passengers and developed the routing algorithms
Tech stack: Nodejs, MySQL, PostgreSQL, OSRM, Kubernetes, Elasticsearch

EDUCATION

Coding Bootcamp, Mobile App Developer Refactory Indonesia

Jan 2017 – May 2017

Vocational Degree, Computer Network SMK Tri Mitra

2010-2013

LANGUAGES

- English
- Bahasa Indonesia

STRENGTHS

- Problem Solving
- Team Work
- Fast learner

Full Stack Developer – *PT. Visi Mulia Asia / Weplay.id*

Nov 2019 – May 2020

WePlay is an Indonesian sports community platform that connects enthusiasts through matchmaking services. As a Developer, I engineered the Node.js backend and developed the React Native mobile application. My work supported core features like community networking

Tech stack: Nodejs, Mysql, React Native

Full Stack Developer – *PT Gudang Solusi - Riamiranda.com*

Jan 2019 – Jan 2020

Gudang Solusi is a software development consultant that builds and maintains enterprise applications for diverse clients . As a Full Stack Developer, I managed the end-to-end technical needs for Ria Miranda, an Indonesian fashion brand . I engineered new features using Golang and React Native, resolved critical bugs, and optimized the backend to successfully handle significant traffic spikes during high-volume flash sale events.

Tech stack: Golang, React Native, Kubernetes

Mobile App Developer – *Triplogic Indonesia*

May 2017 – Jan 2019

Triplogic was an Indonesian on-demand logistics startup specializing in last-mile delivery services for retail, SMEs, and corporate clients. As one of the company's early developers, I built the mobile application using React Native

Intern Mobile App Developer – *Refactory Indonesia*

Jan 2017 – May 2017

Refactory is an Indonesian-based intensive coding bootcamp and software development house that provides technical training and engineering solutions . While enrolled as a student in the mobile development program, I also served as an intern Mobile Programmer . In this dual role, I applied "learning by doing" principles by developing real-world mobile applications for external clients .
